

In TillageMax Bristol®, Tillage Radish® breaks up soil compaction with its aggressive taproot, creating thick channels 30" or deeper. Tillage RootMax® Cover Crop Ryegrass builds soil structure deeper than many ARG varieties. In combination, this outstanding cover crop mixture provides added cover in the spring prior to burndown.

### EXCELLENT FOR:

- Scavenging and storing nitrogen
- Improving water infiltration
- Absorbing manure nutrients
- Relieving compaction

### PLANTING TIPS AND SEEDING RATES:

**PLANTING:** Plant 3 - 10 weeks prior to first killing frost.

**PLANTING DEPTH:** ¼" - 1"

#### SEEDING RATE:

**DRILLING:** 12 lbs/acre

**BROADCAST / AERIAL:** 15 lbs/acre

**PRECISION PLANTING (15" WITH  
1 ¾" IN-ROW):** 10 lbs/acre

**CONTROL:** Tillage Radish® winter kills with 3 consecutive nights in the mid-teens. If no winterkill, add one pint of 2,4-D type herbicide. Tillage RootMax® requires a burndown method of two quarts of glyphosate.

**BEST TO PLANT:** Before most cash crops (as long as adequate spring management is planned).

### FORAGE:

Increase seeding rate to 30 lbs/acre and add one bag of Tillage RootMax® per bag of TillageMax Bristol®. If planting earlier for forage, consider increasing small grain component.
