

# TillageMax MOLINE

Tillage Radish® + Guardian® Fall Rye

TillageMax® Moline meets the objectives of nutrient scavenging, erosion control, weed suppression and soil building, and is perfect for the first time cover cropper; radish winterkills in many regions and winter rye is fairly easy to control. Works well in multiple parts of the country and in marginal soil environments and is ideal after silage harvest or before/after fall manure applications.

## EXCELLENT FOR:

- First time cover croppers
- Marginal soil environments
- Adding biomass
- Weed suppression

## PLANTING TIPS AND SEEDING RATES:

**PLANTING:** Plant 3 - 10 weeks prior to first killing frost.

**PLANTING DEPTH:** ¼" - 1"

### SEEDING RATE:

**DRILLING:** 35 lbs/acre

**BROADCAST / AERIAL:** 40 lbs/acre

**PRECISION PLANTING (15" WITH  
5" IN-ROW):** 30 lbs/acre

**CONTROL:** Recommended to control when Guardian® Fall Rye reaches 18" tall. Use one quart of glyphosate and one pint of 2,4-D product.

**BEST TO PLANT:** After silage harvest or before/after manure application.

## FORAGE:

Increase seeding rates to 40 - 50 lbs/acre or more. If planting earlier for forage, consider increasing small grain component.
